Sample PDF 2 — Attendance & Academic Policy

Practice document for the Generative AI RAG project

Minimum Attendance

Students must maintain a minimum of **75% attendance** in each course to be eligible for the regular end-semester examination.

Attendance is calculated separately for each course.

Attendance Between 65% and 74%

A student with attendance between **65% and 74%** may apply for attendance condonation when supported by an approved reason.

The maximum condonation permitted is 10 percentage points, subject to institutional approval.

Attendance Below 65%

Students with attendance below **65%** are normally not eligible for condonation and may be detained from the regular examination.

Medical Leave

Medical leave must be supported by appropriate medical documentation.

Submission of medical documents does not automatically guarantee approval.

Attendance Calculation

Attendance percentage = classes attended ÷ classes conducted × 100.

Example: if a student attends 42 out of 50 classes, attendance is 84%.

Leave Rules

Students should obtain approval before taking planned leave whenever possible.

Emergency leave should be reported to the department as soon as practical.

Important Note

Students are responsible for checking their attendance records regularly.

Faculty may update attendance records according to the department's approved process.
